

The Drainage Companion™

SELECTION GUIDE

Proudly developed by BrightSky, Australia's leading continence support destination

Using this Selection Guide

A continence assessment conducted by a continence advisor or urologist will help identify the most appropriate continence management plan for an individual. If it has been identified that the individual requires an indwelling catheter or uridome/sheath, a drainage bag will usually be required.

Drainage bags come in a variety of tube lengths, outlet taps and various capacities. To ensure the best fit, it is important to understand where the individual wishes to wear the leg bag and how they are going to empty it. Application requirements vary and BrightSky recommends that you refer to the manufacturer product information leaflet(s) prior to recommending a product.

More information on products listed in this Selection Guide can be found on the BrightSky Australia website. All products can also be ordered through BrightSky Australia.

The products listed in this booklet are those that were available through BrightSky Australia at the time of printing. It is subject to change.

Not all categories from the The Drainage Companion™ are currently populated with products. The booklet will be updated and new products added should these become available from product manufacturers.

Disclaimer: Information contained in this Selection Guide is for general information purposes only. Any decision regarding individual product suitability and its use should always be made in consultation with a health care practitioner.

Contents

How to find the right drainage bag with The Drainage Companion™	4
Category 1 ≤ 350mL	5
Category 2 ≤ 600mL	6
Category 3 ≤ 800mL	7
Category 4 ≤ 1300mL	8
Category 5 ≤ 2000mL	9
Category 6 > 2000mL	10

How to find the right drainage bag with The Drainage Companion™

Step 1

Choose the drainage capacity

Step 2

Determine where the bag is to be worn or hung, this will determine the desired tube length.

Category 1	Tubing	Sterile	Non - Sterile
	Long Inlet Tube 20-50cm	1A	1D
